

COVERAGE AND BENEFITS

Does UnitedHealthcare cover treatment for COVID-19? **New 3/21**

UnitedHealthcare is waiving member cost share for the treatment-related medical expenses of COVID-19 through May 31, 2020, for fully insured individual and group market health plan customers, Medicare Advantage and Medicaid plans. We will work with self-funded customers who want to implement a similar approach on their behalf.

We will also recognize these covered expenses under UnitedHealthcare stop loss policies, including for All Savers customers.

Self-funded clients should check with their stop loss carrier. Changes may require a benefit change.
